

Hainan Research Archive

海南文献资料库项目汇报

A semester outcome of the Hainan Brand Team

HB · SEIC · HAIC

以 2023–2026 年海南相关中外文献整理为核心，服务检索、学习、科研与品牌传播。

Public website: <https://yuyu061128.github.io/hainan-archive/>

What problem are we trying to solve?

我们想解决什么问题？

Problem 1: scattered resources

Hainan-related literature is scattered across CNKI, library portals, international databases and publisher websites.

海南相关文献分散在知网、图书馆、外文数据库和出版社网站。

Problem 3: weak starting point

Create one focused entry point: searchable, topic-oriented, and useful for Hainan studies and Hainan branding.

建立一个聚焦海南的入口：可检索、可分类、可服务研究与传播。

Problem 2: high search cost

Students need to repeat keyword searches across platforms and languages before finding useful references.

学生需要反复切换平台和语言，检索成本高。

Our core answer

For course papers, surveys and branding projects, many users do not know which keywords or topics to start with.

写论文、调研和品牌项目时，常常不知道从哪些关键词切入。

Goal: turn “finding Hainan materials is difficult” into “open one website and start researching Hainan”.

目标：把“找海南资料很麻烦”变成“打开一个网站就能开始研究海南”。

What we built this semester?

本学期成果：我们做出了什么？

Website positioning

A focused Hainan literature index that gathers Chinese and international papers into one searchable website. It supports literature discovery for Hainan-related research and branding work.

一个聚焦海南的文献索引网站，将中外论文集中整理到同一入口，服务海南研究与品牌传播。

Main functions

Keyword search · Year/language/topic filters · Relevance sorting · Literature detail view · Original link navigation

关键词检索 · 年份/语言/主题筛选 · 相关度排序 · 文献详情页 · 原文链接导航

Specific data inside the archive

网站数据的具体信息

Core collection scope

title, author, journal/source, citation, year, topics, theory, summary, URL, language, publisher, identifier, source.

包含题名、作者、来源、年份、主题、摘要、链接、语言、出版者等。

Structured metadata

Project focus: Hainan-related Chinese and international literature, mainly 2023–2026, with additional related records imported during testing.

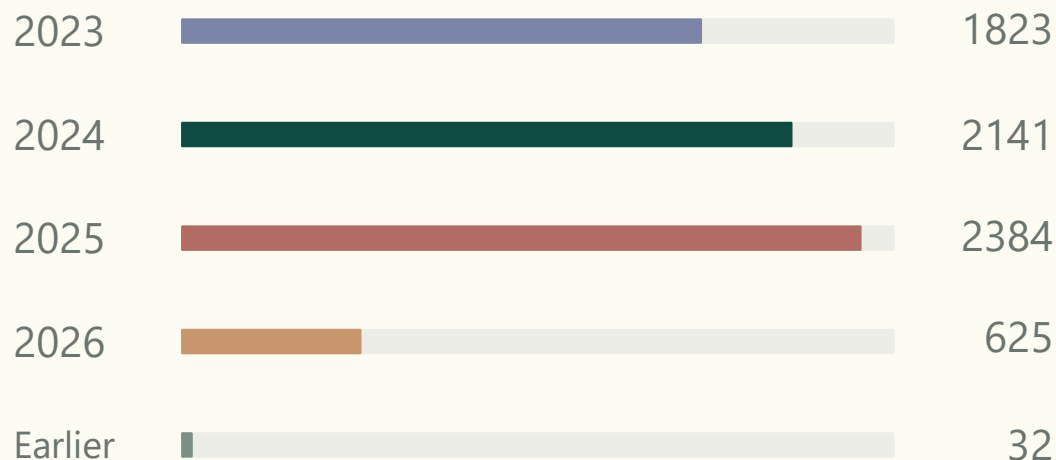

项目核心：2023–2026 年海南相关中外文献，并在测试中导入部分扩展年份记录。

Why these fields matter

Users can judge relevance before opening the original source, which saves time and improves research efficiency.

用户可先判断相关性，再跳转原文来源，节省检索时间。

Records by publication year / 按发表年份分布

Important note for presentation

2023–2026 is the team's main target period. The current data file contains more records because the testing version also imported later-year and related metadata.

汇报时建议说明：2023–2026 是团队整理的核心目标年份；当前测试数据文件中也包含扩展年份和相关元数据，因此总量更大。

Data sources and processing workflow

数据来源与整理流程

1. Search

HNU Library, CNKI / Wanfang / VIP, ASU Library, Public academic sources
海大图书馆、知网、万方、维普、ASU 图书馆等

2. Screen

Keep Hainan-related papers and remove irrelevant results.
筛选与海南主题相关的文献，剔除无关结果。

3. Structure

Extract title, author, year, topic, abstract and source link.
整理题名、作者、年份、主题、摘要与链接。

4. Publish

Convert metadata into data.js and publish through the website.
转入 data.js 并通过网页展示。

Copyright and access principle

The archive provides metadata, search support and navigation to original sources. It does not replace databases, journals or publishers. Original full-text access still depends on the original platform and institutional permissions.

网站提供文献信息整理、检索辅助与原文链接导航，不替代原数据库、期刊或出版社；全文访问仍以原平台权限为准。

Website screenshots: how users search and browse

网站截图：用户如何检索与浏览

Home & search entrance

首页与a检索入口

Search logic

Search fields include title, author, topic, summary, source, language and year.
检索覆盖标题、作者、主题、摘要、来源、语言与年份。

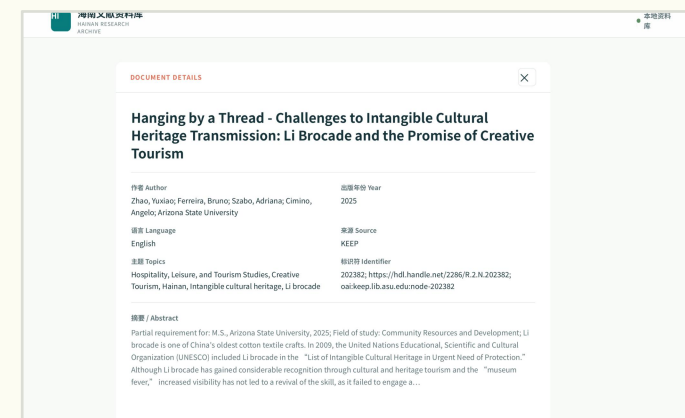

Search results & filters

结果列表与筛选

Filters

Users can narrow results by publication year, language and research topic.
用户可按发表年份、资料语言与研究主题缩小范围。

Document detail window

文献详情弹窗

Detail view

Each record can show title, author, year, source, abstract, identifier and link.
详情页可显示题名、作者、年份、来源、摘要、标识符与链接。

Problem & solution 1: keyword search may fail on some devices

问题与解决 1：部分设备关键词检索可能搜不到文献

Observed during testing

Some classmates opened the website and searched by keywords, but the result page showed no literature even when relevant records should exist.

测试阶段：部分同学打开网站后，关键词检索出现“搜不到文献”的情况。

Diagnosis 排查判断

The website uses front-end JavaScript to load data and run browser-side search. After checking the code and test feedback, the possible reason is compatibility differences on certain phones or mobile browsers.

网站依靠前端 JavaScript 加载数据并执行检索；排查后判断，部分手机或移动浏览器可能对所用 JavaScript 代码兼容性不足。

Solution in progress: cross-device testing · simplify JavaScript syntax · add fallback loading/search logic · improve empty-result messages · optimize mobile browser compatibility.

正在改善：跨设备测试 · 简化 JS 语法 · 增加加载/检索兜底逻辑 · 优化“无结果”提示 · 提升移动端浏览器兼容性。

Problem & solution 2: from local-only file to public website

问题与解决 2：从本地运行到公开分享

Original problem

At first, the website could only run on the creator's computer and could not be conveniently shared with other users.
最初网站只能在制作者电脑上运行，无法方便分享给他人。

Root cause

Whether using MySQL, Excel import, or local code, the project depended on one local machine rather than a public server.
无论是 MySQL、Excel 导入还是本地代码，都建立在一台电脑上，而不是服务器上。

Solution

Upload core files to GitHub and publish them with GitHub Pages, creating a public URL for access.
将主要代码上传到 GitHub，通过 GitHub Pages 生成可公开访问的网址。

Local computer

localhost / local files
Hard to share
Dependent on one device

本地文件 / 本机运行

GitHub repository

index.html / styles.css
app.js / data.js

代码集中管理

GitHub Pages

Public URL
Shareable link
No local setup needed

生成公开网址

Scan to access / 扫码访问

Result: the archive became shareable, easier to test, easier to update, and more suitable for future campus-wide promotion.

结果：网站可分享、可测试、可持续更新，也更适合未来在全校推广。

Improvement directions: make the archive more reliable and useful

改进方向：让资料库更可靠、更好用

Data cleaning

Standardize authors, titles, years, sources, DOI/identifier and missing abstracts.

数据清洗：统一作者、题名、年份、来源、DOI/标识符与缺失摘要。

Topic refinement

Add clearer categories such as FTP, tourism, culture, ecology, education, rural revitalization and international communication.

主题细化：自贸港、旅游、文化、生态、教育、乡村振兴、国际传播等。

Bilingual interface

Improve English/Chinese labels to serve local students, international students and foreign teachers.

双语界面：服务本地学生、国际学生和外籍教师。

Citation export

Add one-click APA / MLA / GB/T 7714 citation support for writing papers.

一键引用：支持 APA、MLA、GB/T 7714 等格式。

Device compatibility

Improve mobile search compatibility and browser fallback for testing problems.

设备兼容：改善移动端检索兼容与浏览器兜底。

Regular updates

Build a semester or monthly update mechanism and keep recording new literature.

定期更新：建立每学期或每月更新机制。

Next step: combine content improvement + technical optimization + campus promotion. /

下一步：内容完善 + 技术优化 + 校园推广。

Project value: from search tool to shared knowledge infrastructure

项目价值：从检索工具到共享知识基础设施

For students

- Faster literature search for course papers, reports and thesis topics
 - Learn Hainan-related English keywords and concepts
 - Use abstracts and source links to write with evidence
- 对学生：降低检索门槛，快速进入选题，用资料支撑写作。

For the Brand Team

- Turn literature into story angles for culture, tourism, ecology and FTP
 - Support bilingual content, public communication and project planning
 - Build a reusable knowledge base for future members
- 对团队：把文献转化为海南品牌内容与项目素材。

For HNU

- Potential campus-level entry point for Hainan studies
 - Supports teaching, student research and local service
 - Can be shared by different colleges and courses
- 对海大：未来可成为全校师生共享的海南研究入口。

For Hainan

- Better discovery of Hainan knowledge
 - Stronger academic basis for place branding
 - More international expression
- 对海南：让海南知识更容易被发现和传播。

Promotion expectation: move from a team outcome to a university-wide tool for Hainan literature search and project practice.

推广期望：从学生团队成果，逐步发展为海大师生都能方便使用的海南文献检索与项目实践工具。

How it can be used across campus

Course papers · research training · surveys · innovation projects · branding proposals · international communication.
课程论文 · 科研训练 · 社会调研 · 大创项目 · 品牌策划 · 国际传播

Scan / 扫码访问

Future expectation: make it usable for all HNU teachers and students

未来期望：推广到所有海大师生方便使用

Campus use

Introduce the archive in related courses and student research training.
进入相关课程和学生科研训练。

Library link

Explore cooperation with library resources and database training.
与图书馆资源和数据库培训结合。

Team update

Keep updating literature each semester and train new team members.
每学期更新文献，并培养后续成员维护。

Research support

Support papers, surveys, innovation projects and branding proposals.
服务论文、调研、大创和品牌策划。

International view

Help students compare Chinese and foreign research about Hainan.
帮助学生对照中外海南研究。

Shared resource

Build a long-term Hainan knowledge entry point for HNU.
建设长期共享的海南知识入口。

Vision: discover Hainan, understand Hainan, and communicate Hainan with evidence.

愿景：发现海南、理解海南、用证据传播海南。

We hope to turn “finding Hainan-related materials is difficult” into
“open one website and start researching Hainan”.

我们希望把“找海南资料很麻烦”，
变成“打开一个网站就能开始研究海南”。

Thank you !
